

$$7 + 5 = 12$$

Prove it five ways.

$$7 + 5 = 10 + 2$$

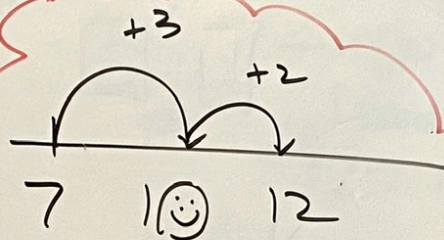

5 across the top  
5 across the bottom  
2 across the middle

So, double 5 is 10.  $5 + 5 = 10$   
10 and 2 more is 12.  $10 + 2 = 12$

1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12

(7), 8, 9, 10, 11, 12

$$7 + 3 = 10$$

$$10 + 2 = 12$$

$$7 + 5 = 7 + 3 + 2$$

$$= 10 + 2$$

$$(3) (2) = 12$$
